The Conficker Removal Tool for Single PC is a small software application whose purpose is to help you scan your computer for Conficker malware entries and get rid of them. The tool is developed by Bitdefender and can be deployed on all Windows versions out there. Conficker is a worm that targets Microsoft Windows operating systems by taking advantage of several vulnerabilities. It is capable of targeting networking websites like Facebook, Skype, and Yahoo! Messenger, email websites (e.g. Gmail, Yahoo! Mail), as well as other sites like Myspace and Twitter. The worm is able to steal private information, such as banking information, credit card numbers, and passwords, turn off system services (e.g. Windows Defender, Microsoft Security Essentials), download random files, and restrict access to several webpages. Portable running mode You can take advantage of the program's portability status and keep it stored on pen drives or other similar devices so you can carry it with you all the time. Plus, you may open it directly from the storage device. It's easy to gain access to the utility's interface because you only need to double-click on the executable file. An installation process is not required. Clean looks and virus removal options Conficker Removal Tool for Single PC sports a straightforward interface that allows you to set up the dedicated parameters in no time. A help manual is not included in the package. However, you can quickly get an idea about how to tweak virus removal tasks. The application keeps a log directly in the main panel and reveals information about the scanned items and detected virus entries. Plus, it lets you know if your computer is infected or not. In order to carry out the cleaning process, you need to restart the computer. Conficker Removal Tool for Single PC allows you to scan your PC thoroughly and remove any traces of the virus. The time needed to complete a scan job pretty much depends on the number of items stored in your PC. Publisher: Bitdefender, Inc.
