In this study, we found that the TAS3R3-rs9701796 polymorphism of FGIDs is associated with the development of FGIDs in the Han population in China. TAS3R3-rs9701796 can enhance the sensitivity of T2R3 for bitter substances, thereby increasing the bitter taste of drugs and food. Some drugs with bitter taste may induce FGIDs, and it has been reported that some drugs, such as caffeine, are also the cause of FGIDs. We also found that TAS3 a1d647c40b
