

HansaWorld Enterprise Crack Activation Key

[Download](#)

HansaWorld Enterprise Download (Updated 2022)

HansaWorld Enterprise is a modular, enterprise-wide ERP and CRM system. Typical installations are for 10 to 200 concurrent users, or for smaller but demanding customers. Strong selling features are multi platform, multiple currency, WAN, hotel, varieties, POS, production, integrated web shop. □ Strong focus on the worldwide enterprise HansaWorld Enterprise is suitable for a wide range of verticals with fully integrated front end and back end functionality. Contracts (repetitive invoicing), Consolidation, EDI (exchange of data between systems), EPOS (electronic point of sales), Resource Planning and Service Orders (for repair companies). □ Direct Webshop HansaWorld direct webshop is an out-of-the-box solution whereby customers log on and place orders directly to the HansaWorld server from a web browser. This ensures that all data (stock, prices, credit limits etc.) are real-time, eliminating the need to synchronise two separate databases thereby dramatically promoting reliability. The direct webshop can be considered a very quick and cost-effective solution. □ On-line Webshop HansaWorld's open TCP/IP connections, separate website databases can communicate in real-time with HansaWorld Servers. HansaWorld's WAN strengths come to the fore here: as the website is usually located at an ISP, there is a strong argument also to host the HansaWorld Server at the ISP (which is not an option available to many competitors). This is one of the bases on which HansaWorld is marketing ASP (also called "co-location services" or "server hosting") - it is an easy way for ISPs with strong website development arms to enhance their business. This method is well suited to companies with existing websites, and also to companies with a need for high security, as the solution enables maintenance of two separate servers (for the website and the accounting system). □ Customisable E-commerce HansaWorld has released a refined version of the direct webshop whereby web screens can be completely customised using HansaWorld's programming language, HAL (Hansa Application Language). This will allow HansaWorld and HAL Accredited dealers to create any web front-end to HansaWorld software - this goes well beyond web shopping, allowing, for example, a consultancy company to create a web time recording system for entry to HansaWorld Enterprise. □ It is modular
