5 Reasons Why Google Apps is Better than Office

Office is a very large application and it's one of the most popular office suites. It's too expensive for most people so instead they go for Google Apps. You may have a few questions about why it is better to use Google Apps instead of Microsoft Office. Here are 5 reasons why Google Apps is better than Microsoft Office:

1. You can

access it anywhere. Office is only available on Windows based computers, but with Google Apps you have access to your information anywhere and on any platform. 2. You don't need an email address. You can create an account with Google and use it without needing an email address. 3. Google provides a lot of free storage space. Microsoft provides only 5GB per user. 4. There is no performance hit. Microsoft Office applications have a performance hit that slows your computer down. 5. Your data is all organized. You don't need to get

anyone to help you make folders. Google Apps is always evolving and it's a great way to experience the benefits of cloud computing. You'll enjoy having your documents with you on all of your devices and this way you will never have to worry about losing them.
