What's New In?

A comprehensive personal organizer that enables you to keep all your notes, event, to-do lists, appointment, events and tasks in one location for each access and management. The program includes a nifty note editor that features auto-correct and spell check as well as various formatting tools, so you can create memos, lists, add tables or create mind maps. In addition,

the editor allows you to include images and documents, but the formats supported are limited to JPG, PNG and BMP and respectively, DOC, TXT and RTF. Includes several agenda management utensils The idea behind the utility is to provide you with a versatile and intuitive environment that enables you to take notes, manage documents, emails, events and other tasks without having to open your browser or other third party software solutions. Therefore, all the data that you store within the application is stored in a single local database that you can backup,

so you do not lose any critical information. As far as the organization tools are concerned, the tool comes with numerous pre-defined categories that make it easy for anyone to organize and access notes or other information, regardless of their experience. Lastly, the app allows you to edit objects (events, lists, to-do, notes, etc.) according to your needs, preferences and working or personal style.
